

Sandblaster®

Immersion thermostats -

CSB-IFE series

COMMERCIAL ELECTRIC

WATER HEATERS

CSB - 82/120

Designed for use as a recovery heater having its own storage tank.

- Meets the standby loss requirements of the U.S. Department of Energy and current edition of AHRAE/IES 90.1.
- Plain English text and animated icons display detailed operational and diagnostic information. Fault or Alert messages appear if an operational issue occurs.
- Immersion temperature control adjustable through a range of 90°F to 190°F.
- Control system automatically lowers the Operating Set Point by a programmed value during user-defined time periods. Helps reduce operating costs during unoccupied or off - peak demand periods.
- Linear sequencing. Banks of heating elements (3 elements per bank) are energized according to adjustable (1 to 20°F) differential set points for each bank. First bank on is the last bank off. Helps reduce current surge and provides accurate water temperature control.
- All CSB models ship standard with with industrial grade low watt density incoloy elements, providing life with superior scaling resistance.
- Glass-lined tank. Two sizes; 270 and 400 litre capacity. Tank interior is coated with glass specially developed by State for water heater use. Foam insulation reduces costly heat loss. ASME (optional) maximum working pressure is 160 psi.
- Power circuit fusing. Protects elements and contactors from short circuits, overloading or line surges. Meets National Electric Code requirements (fusing required when current draw exceeds 48 amps).
- Terminal block. Factory installed. Allows for easy service connection to block.
- Magnetic contactors. Heavy duty; UL rated 100,000 cycles.
- Immersion style thermostat.
- Simplified circuitry, color coded for ease of service
- Hinged control compartment door for quick, easy access.
- Two anode rods for maximum corrosion protection.
- Cabinet has bonderized undercoat with baked enamel finish.
- Top outlet, side inlet and relief valve openings.
- CSA certified and ASME rated T&P relief valve.

SAMPLE SPECIFICATION

The heater(s) shall be Sandblaster® Commercial Electric Model Number _____ -IFE(A) as manufactured by State Water Heaters or equivalent. Heater(s) shall be rated at _____ kW _____ V _____ phase, 60 cycle AC as listed by Underwriters' Laboratories. All models meet National Sanitation Foundation NSF-5 requirements. Water heater shall have LCD display with built-in diagnostic and troubleshooting information. Tank(s) shall be _____ (80 or 119) gallon capacity with _____ (150 [Std] or 160 [ASME]) psi working pressure and equipped with dual extruded high density anodes. All internal surfaces of the heater(s) exposed to water shall be glass-lined with an alkaline borosilicate composition that has been fused to steel by firing at a temperature range of 1400°F to 1600°F. Electric heating elements shall be 24K Goldenrod medium watt density screw-in type with Incoloy sheath and ceramic terminal block. Internal power circuit fusing shall be provided. Element operation shall be linear sequencing through individual magnetic contactors. Control circuit shall be factory fused and include an immersion thermistor temperature probe with built in ECO control. Control cabinet and jacket shall be of baked enamel finish and shall provide full size control and element compartment for complete service and maintenance performance through front hinged compartment door, and enclose tank with foam insulation. 1 1/4" inlet and outlet connection shall be provided. The heater tank shall have a three year limited warranty and controls and accessories shall have a one year limited warranty as outlined in the written warranty. Fully illustrated instruction manual to be included. For multiple installation, factory built manifold kits for _____ (2, 3 or 4) heater installation shall be provided. Meets or exceeds the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IES 90.1.

Options

- ASME 160 psi (1103 kPa) tank construction.
- UL Listed conversion kits to adjust voltage and kW requirement in the field before and after installation.
- Manifold kits for multiple tank installations. Two heaters -part # 100109231, three heaters- part # 100109232 and four heaters- part # 100109233.
- International voltages – 220, 380, 400, 415, 575, and 600 volts, three phase available with Y connected elements.
- For CSB models we recommend installing expansion tank ETC 10X in cold water line. Installation of an expansion tank is required if a check valve is mounted in the cold water supply line.

Model number	Gallon capacity		Dimensions						Inlet/Outlet (NPT)	Approx. shipping weight	
			A		B		C			lbs	kg
	gal.	litre	Inches	cm	Inches	cm	Inches	cm	Inches		
CSB 82	73	275	60-1/4	153	25-1/2	64.8	31	78.7	1-1/4	280	127
CSB 120	107	405	62-1/4	158.1	29-1/2	75	35	88.9	1-1/4	390	177

For ASME Construction add "A" to the end of the model number (example: CSB 82 24 IFEA).
